

# Press Release

## **ACUSTRIP Bacteria/Mold Test #84050**

**March 2015**

ACUSTRIP, leading Fluid Diagnostics since 1989, continues to bring new innovations in vehicle fluid diagnostics. ACUSTRIP Fluid Diagnostic® products have been proven to be effective with Automotive Service Providers, DIYers and OEMs worldwide. Customers praise ACUSTRIP products for their reliability and ease of use.

The Bacteria/Mold Detection test # 84050 provides “on the spot”® fast, easy and reliable detection for the presence of mold and bacteria. Commuters spend many hours in their vehicles and exposure to damp and moldy environments may cause a variety of health effects. Early detection and remediation of bacteria/mold can minimize negative impacts on the drivers’ and occupants’ health.

The presence of bacteria/mold should be tested for at each oil change, or preventative service visit.

One simple *dip and read test* can detect the presence of mold.

ACUSTRIP® #84050 is available in convenient to use kits of 50 or individual tests.
