Press Release

ACUSTRIP ACUTEST2 Antifreeze and Brake Fluid Test

Oct 15, 2015

ACUSTRIP Company, Inc., the leading fluid diagnostics manufacturer since 1989, announces the release of the revolutionary ACUTEST2. The ACUTEST2 is a single kit allowing service providers or DIY'ers to make multiple assessments by combining the leading multi-point antifreeze coolant test with a brake fluid moisture (boil point) test. The condition of the fluids can be checked while the vehicle is in the service bay, or the kit can be sent to clients for them to perform the test themselves so as to encourage them to visit the shop when service is needed. Customers consistently praise ACUSTRIP patented products for their ability to detect problem situations before they result in unexpected breakdowns or expense. ACUSTRIP tests have a well-earned reputation as reliable and easy to use. The test strips are individually wrapped, protecting them until they are needed.

ACUSTRIP will be providing **free samples** for the first 200 visitors at AAPEX 2015 Booth 37035.

ACUSTRIP® ACUTEST2 is available in point of purchased Displays, in cases of 100.

For Release Oct 2015
