ACUSTRIP Announces Ethanol Test

In a continued effort to meet customers' needs, ACUSTRIP Company, Inc. has expanded its aftermarket parts line to include a new Ethanol in Fuel Test (98761). The easy to use test strip detects the percentage of Ethanol in gasoline. The risk of affecting your vehicle warranty exists as extra ethanol can corrode plastic, rubber, and metal parts in engines that are not built to handle it. Protect your investment by avoiding this risk by testing your fuel with the Acustrip Ethanol in Fuel Test Kit. The kit contains everything your need for five tests.

About Acustrip

Founded in 1987, Acustrip Company has a well-deserved reputation as the manufacturer and provider of America's best coolant test strips. Acustrip manufactures diagnostic test strips for brake, fuel, power steering, water quality, mold/bacteria and DEF. Acustrip currently manufactures several products for OEM distribution and has been approved by major auto and equipment manufacturers. The Acustrip name is renowned worldwide for the quality dip and read diagnostics that provide convenience and accuracy for on site evaluation of fluids. Acustrip has become the choice source of test strips by fleet managers DIYers professional service providers, and major service centers and labs around the world.
