ACUSTRIP announces an alliance with Three-in-One Enterprises (TIO)

Three-in-One will be featuring ACUSTRIP Fluid Diagnostics at major international auto shows, regional distributor functions and various "invitation only" internal trade meetings in the auto, truck, construction equipment and commercial machinery events.

Recognizing the success of TIO from a commercial arrangement established 20+ years ago, Ron Schornstein, President of Acustrip, noted that, "TIO brings a number of significant distribution channels that will capitalize upon the marketplace that has seen rapid shifts in applications". Schornstein continued, "Use of Acustrip products continues to make a significant impact on revenue increases as well as reduction in operating costs throughout our global network of distributors, suppliers and end users. TIO is poised to extend our success as a true alliance partner."

TIO president Mr. Ed Chen confirmed the potential stating, "We have been commercially aligned with Acustrip for a number of years. The recent introduction of the new category of products presents an opportunity for TIO and our network to promote a product line valued by quantifiable results. An exciting time for us!"
